W03-P2: show reviews[0] info when DOM is loaded

The screenshot displays a web development environment with Visual Studio Code on the left and a browser preview on the right. The code in the editor shows a JavaScript script that listens for the 'DOMContentLoaded' event and populates a review card with data from a 'reviews' array. The browser preview shows the rendered 'Our Reviews' page with a card for Susan Smith, a web developer, featuring her profile picture, name, job title, and a paragraph of text. The DevTools console on the right shows the log output of the script, confirming that the review data is correctly assigned to the DOM elements.

```
JS app.js M X
JS app.js > window.addEventListener('DOMContentLoaded') callback
31
32
33 const img = document.querySelector('#person-img');
34 const author = document.querySelector('#author');
35 const job = document.querySelector('#job');
36 const info = document.querySelector('#info');
37
38 const prevBtn = document.querySelector('.prev-btn');
39 const nextBtn = document.querySelector('.next-btn');
40 const randomBtn = document.querySelector('.random-btn');
41
42
43 let currentItem = 0;
44
45 window.addEventListener('DOMContentLoaded', () => {
46   const item = reviews[currentItem];
47   console.log('item', item);
48   img.src = item.img;
49   author.textContent = item.name;
50   job.textContent = item.job;
51   info.textContent = item.text;
52 });
53
```
